Hemispheric IP Video Door Station

The Door Station modules can be combined with one another. This allows every customer to configure a tailor-made system: one to five bell buttons, connection via two-wire cable or network cable, in white, silver-metallic, dark gray, black or amber.

Better Overview. Increased Security. More Possibilities.

The IP Video Door Station from MOBOTIX is an innovative, modular system for door communication and access control. The system supports the VoIP/SIP video telephony standard and can be upgraded or modified at any time. The camera module featuring innovative MOBOTIX 5MP technology records all events taking place in front of the building or gate; when the bell is pushed, when motion is detected in the image area or upon triggering a contact. Fit for any weather, at dawn and dusk, as well as for backlight situations.

- Complete view from wall to wall and floor to ceiling thanks to hemispheric MOBOTIX technology
- Records the entire area in front of the door, including sound, automatically and around the clock
- Intercom with remote opening function, accessible globally, e.g., via PC or MOBOTIX App
- Integrated message function for leaving and listening to messages directly at the door
- Keyless access via PIN, transponder or MOBOTIX App
- Simple installation, optionally even without an IP cable via two existing bell wires
- Combination of MOBOTIX cameras and system accessories to a multifunctional comprehensive system

from €1.404 (incl. Triple In-Wall Mount, Triple Frame, CamCore, Info module, BellRFID module, Ethernet terminal board, 1 Admin Card, 6 User Cards, software)

Hemispheric IP Video Door Station – Complete Panorama View For Superior Overview

The high-resolution Hemispheric door camera with 5 megapixel image sensor and internal MicroSD storage allows monitoring of the entire entrance area. Complete Panorama view from wall to wall and floor to ceiling.

Modules

- T25-CamCore
- Allround view with no blind spots
- Speaker, microphone, bell and light button
- Integrated LED illumination

KeypadRFID

- Keyless entry via PIN or transponder
- Integrated message function

Info module/Info2wire+

- LED-backlit info module
- Info2wire+ product version for connecting the outdoor station via two-wire cable (data and

BellRFID Bell Button Module

Each of the six bell button sets can be used without having to replace the BellRFID basic module. The bell button set can be exchanged at any time. Integrated RFID technology for keyless door opening via transponder. Blue function key for checking voice mailbox messages directly at the Door Station. The MOBOTIX website offers a free-ofcharge printing service for BellRFID and the info module.

Accessories

Frame (without modules)

- Available for on-wall or in-wall mounting
- Weatherproof (IP65)
- Versions for 1 to 4 modules
- Integrated module anti-theft protection

MX-DoorMaster

- Door opener and doorbell (volume and melody can be configured)
- Backup power supply with battery (up to 60 hours)
- 2 function buttons, 2 status LEDs

MOBOTIX App

- For iPhone/iPad/iPod touch iOS 5 or higher
- Connect to the door station from anywhere via Wi-Fi or UMTS

Available colors

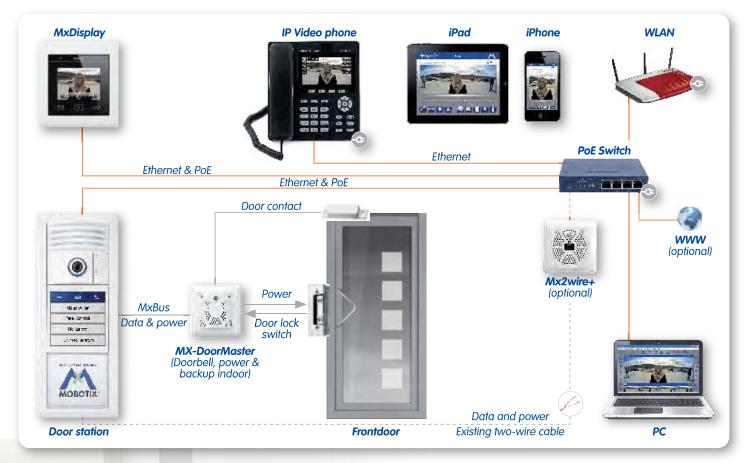

- Available in white, silver-metallic, dark gray, black, amber
- Modern, unobtrusive design

Virtual PTZ (vPTZ) Digital pan/tilt/zoom, continuous 8x zoom, full image recording in the background Alarm/events Triggering of events by integrated multiple-window motion detection, temperature sensor, notification over email, FTP, IP telephony (VoIP, SIP), visual/acoustic alarm, pre- and post-alarm images

Hemispheric IP Video Door Station – Simple And Cost-Effective Installation

The MOBOTIX IP Video Door Station can be connected and supplied with power via a network cable or – thanks to the Mx2wire+ technology – via two bell wires.

Very Simple Installation

Quick And Cost-Effective Mounting

What does a typical system look like and what kind of cabling is needed? The system image shows the schematic structure of a hemispheric IP Video Door Station including the Security Door Opener from MOBOTIX for inside installation next to the door (MX-DoorMaster).

The outdoor station network connection and power supply are supplied via an Ethernet cable (PoE technology) or alternatively using the Info2wire+ expansion set via a twowire bell cable. This way, the existing doorbell or simple door intercom system can be replaced by a versatile access control system with a high-resolution MOBOTIX Door Station with little extra effort or cost.

Thanks to standard network technology and intercompatibility of the MOBOTIX systems, Door Stations and any number of additional security cameras can be combined into a highly efficient end-to-end solution that can be controlled from a single remote station - access control, video security and house automation from a single source!

Hemispheric IP Video Door Station - Simple Network Connection

The outdoor station requires just one cable for data and power to be connected to a PoE switch and thereby to any expandable Ethernet network.
